Howay the Trees

Come and plant trees with other young people!

Are you a young person aged 16-24? Would you like to get involved with some practical conservation work? Get stuck in with some winter warming activity!

As part of Northumberland Wildlife Trust's work for the North East Community Forest, we are replanting hedgerow trees on the Town Moor.

No previous experience of tree planting is required. This is not a highly physically demanding task, but please note that the terrain may be uneven. Dress according to the weather.
