Community Transport - Home Furniture Reuse (East End)

CT Furniture Newcastle East stocks a variety of domestic and office furniture to help individuals, families, businesses and community organisations find affordable furniture items with ease.

They also sell a range of new beds and other items.

All electrical items are PAT (portable appliance tested,) and function tested and include fridges, freezers, microwaves, TVs, lamps and more.

The majority of items have been donated by residents who want to recycle and help the environment.
