

Carelink24

Carelink24 provides personal alarms for older people and those in need of extra support at home.

The Lifeline Vi Unit is simple to use.. The unit is a plug & play device – which means you can install it using your telephone socket and a power socket.

There are three buttons. These include the red “Help” button, which you can press in an emergency; the green “Cancel” button – just in case you press your pendant by mistake and “Home/Away”
