Northern Gas Networks

Northern Gas Networks are the gas distributer for Yorkshire, North East & northern Cumbria. They provide the regions gas emergency service.

Call 0800 111 999 if you smell gas.

Vulnerable people such as those with Alzheimer's or learning disabilities may need extra protection from gas leaks in their home. You can request a **locking cooker valve** which can be fitted for free by a your gas provider. The valve allows carers to lock off the gas supply so the cooker cannot be used unless the key holder is present.

They have a Priority service for people who feel that they would benefit from extra help, tailored communication and emergency support during a power cut. You can register for their priority services register on their website or call them
