

Daisy Network

Daisy Network provides information and support to women diagnosed with early or premature menopause. This is also known as Premature Ovarian Insufficiency (POI). They provide:

- an online support network of people to talk to
- an opportunity for members to share information about your personal experience of POI
- local Network in Newcastle: to take part in the local group, you need to register as member. There is a cost to register as a member
- information on treatments and research such as Hormone Replacement Therapy (HRT) and assisted conception
