

## Gas Safe Register

The Gas Safe Register provides a single information point for people to find a registered, competent boiler engineer in their area, or to check that a company they are planning on using is registered. By law, all Gas Engineers must be on the Gas Safe Register to carry out gas work in the United Kingdom.

You can find a Gas Safe registered business near you using their [online search](#) option or by calling their helpline.

You can also fill in a form to remind you to get your appliances checked. The system will send you an email or text.
