

Ageing Without Children (AWC)

Ageing Well Without Children (AWC) believe that, by improving things for people ageing *without* children, will improve things for *all* older people. AWWOC aim to:-

- conduct/encourage research into the impact on services of the growing number of people ageing without children
- emotional support to allow discussions about the emotional aspects between those who are ageing without children
- long term services and solutions to meet the needs of an ageing population
- campaigning for government policy and practises to change to meet the needs of an ageing population
