

## Education Partnership North East

Education Partnership North East is a collaboration between Northumberland College, Hartlepool Sixth Form, and Sunderland College. Our reach spans from Berwick down to Teesside, and we're excited to share our updated offer of fully funded Virtual Learning courses now available to adults who are aged 19+, lived in the UK for more than 3 years and not on an apprenticeship. Asylum seekers and Refugees require to have lived in the UK for 6 months and have the relevant eligibility to work.

Delivered entirely online by Education Partnership North East an Ofsted Outstanding training provider these programmes are designed to equip learners with practical, job-relevant skills while offering the flexibility to fit around work, family, and personal commitments.

While many of our courses are tailored to the Health and Social Care sector, we also offer a growing range of programmes that support development across other industries. This makes our provision suitable for a wide variety of service areas, helping to strengthen communities and meet evolving workforce development needs.

We also have the capacity to deliver closed cohorts of virtual learning, allowing tutors to adapt course content to better reflect the specific needs and priorities of your teams or service users. This ensures a more relevant and impactful experience for individuals, businesses, and community groups alike.

Our offer includes subjects that promote workplace development, personal growth, and community resilience all designed to empower learners and support long-term success.
