

Gosforth's Wild Web: Coastal Wildlife Walk

Join NHSN Field Naturalist Matthew Harrison for a friendly, guided walk exploring our coastline in search of the fascinating plants, insects, crustaceans and birds that thrive in these dynamic coastal habitats.

Along the way, you'll discover how wildlife has adapted to life by the sea, keep a close eye out for migrating birds, and contribute records to Gosforth's Wild Web.

Suitable for both beginners and experienced naturalists alike.
