

Don't Call Me Scary!

Part of the [Black History Month](#) collection.

What happens when the story being told about you is wrong, and no one around you can name it?

Monique's book draws on her own journey — as a Black woman, a mother, and a professional who has spent decades navigating rooms not built with her in mind — and speaks honestly about self-discovery, faith, and the work of simply carrying on.

Monique's work follows one throughline: helping people notice what's happening to them, name it clearly, and navigate forward — with authenticity, resilience, and their voice fully intact.

Join Monique for a talk about her book and her wider work.
