Beyond Four Walls - Our John Muir Journey

The Recovery Support Team provides a range of rehabilitative and supportive services to Newcastle residents with mental health problems their relatives and carers.

This year the group have been working on obtaining **The John Muir Award**. The John Muir Award supports people to experience and protect wild places. For some, wild places are already part of their daily lives. For others, working towards an Award offers a first meaningful experience of a wild place. Spending quality time connecting with and caring for wild places, participants begin to understand the value of these places – and their role in protecting them.

We are holding an exhibition of our work. This will be at the Civic Centre Aches presented by our residents of Scrogg Road to show their creativity, and stories.
